

Lawrence County Department of Planning

Presents

What's in store for 2025?

The Lawrence County Comprehensive Plan was adopted in 2004, with sections updated in 2010. In 2015, the County Planning Department is embarking on a full update to the Plan, with a mission to:

- Stimulate progressive planning and visionary thinking
- Improve County-Municipal partnerships
- Manage growth and development pressures
- Enhance economic development
- Establish market trends and prepare a fiscal analysis
- Identify infrastructure needs
- Prepare model ordinances
- Identify Best Management Practices

Stakeholder Meetings – January/February 2015

A variety of government agencies and community organizations will be responsible for assisting in the development and ultimately, implementation of the recommendations identified in the County's Plan. As part of the Update, we are meeting with existing organizations to discuss and gather input as to what the priorities for the county should be over the next ten years.

This is YOUR opportunity to have a say in the future of Lawrence County!

Lawrence County Comprehensive Plan Update
